Segment

All

Insight 1: Profitability remains stable nationwide. Profit Margin consistently stays around 25-26% across all segments and regions, indicating strong cost control and a well-balanced pricing strategy.

Insight 2: Discounts are moderate and do not erode margins. The average discount is approximately 11% in the Technology category and similar across other segments, showing that discount policies are healthy and do not negatively impact profitability.

Insight 3: The Corporate segment delivers the strongest margin. Corporate customers achieve a Profit Margin of 25.45%, outperforming the overall average and confirming a stable, predictable, and profitable customer base.

Insight 4: Strong geographic performance in the South and West regions. The South and West regions generate the highest sales, with Tennessee, Oregon, and Arizona ranking among the top-performing states. These areas act as the primary growth drivers.

Insight 5: Premium products generate the highest profit contribution. The top 5 products by profit consistently come from the Technology and Office Supplies categories, confirming that premium products deliver the strongest profitability.
